Diagnosis:	Pitta Aavrana of Vyana Vayu / Uchha Raktachapa (Severe Essential Hypertension) with Murchha		

TO WHOMSOEVER IT MAY CONCERN

This is to certify that Mr. Vijaydutt Sharma, a 36-year-old male, was admitted to Ayurvritta Ayurveda Hospital and Panchakarma Center under my care from 30/04/2026 to 07/05/2026 for comprehensive Ayurvedic management.

Upon thorough clinical examination and Nadi Pariksha, the patient was diagnosed with Pitta Aavrana of Vyana Vayu, manifesting clinically as Uchha Raktachapa (Severe Essential Hypertension) accompanied by episodes of Murchha (syncope/fainting). The vitiation of Pitta Dosha obstructing the normal physiological pathways of Vyana Vayu led to significant cardiovascular distress and neurological symptoms.

During his inpatient stay, an intensive Ayurvedic therapeutic protocol was administered. This included targeted Shamana Chikitsa (pacifying therapies) utilizing potent Medhya and Hridya formulations to regulate blood pressure and restore neurological balance. Additionally, Shodhana therapies and specialized external procedures such as Shirodhara were performed to alleviate the Aavrana, calm the nervous system, and stabilize the aggravated Doshas.

The patient responded favorably to the prescribed Ayurvedic regimen, demonstrating marked stabilization in his blood pressure readings and a complete cessation of Murchha episodes. However, considering the severity of the initial presentation and to consolidate the therapeutic gains, he is strongly advised complete physical and mental rest for a period of 5 days post-discharge. He has been prescribed a detailed discharge medication plan along with strict Pathya-Apathya (dietary and lifestyle guidelines) to prevent recurrence. A mandatory follow-up consultation is scheduled to monitor his continued progress and adjust the treatment plan as necessary.
